Experience

Datametica - Onix **July 2024 - Present**
Member of Technical Staff *Pune, Maharashtra*

- Designed and built **Eagle Eye**, an LLM-powered query agent that answers natural-language questions across a multi-store data estate — Neo4j knowledge graph, PostgreSQL usage reports, a documentation corpus, and a live lineage service — behind a single FastAPI endpoint.
- Leveraged LLMs via the LangChain4j framework to generate database lineage through AI for previously unparsed queries, increasing parsing accuracy to 98%.
- Developed a Spark application utility to create small data subsets for debugging on local machines.
- Utilized Java Profiler to identify memory hotspots in the application, optimizing performance and reducing its memory footprint.
- Used Apache Airflow to orchestrate, schedule, and manage workflows for the deployed application in production environment.
- Involved in migrating an in-memory Lookup database to PostgreSQL, ensuring data durability, consistency, and system reliability.

Datametica **August 2023 - June 2024**
Intern *Pune, Maharashtra*

- Utilized Groovy, Scala, and Java to implement solutions and enhancements.
- Employed Test-Driven Development (TDD) methodology during product development.
- Made changes and enhancements to a Spring Boot application to improve system functionality and maintainability.

Projects

Malaria-Parasite-Detection :

- Frameworks used: TensorFlow, Keras, Pandas, Django.
- Created a web-based application to detect malaria parasites in RBCs with an accuracy of 96 percent. Developed a unique approach leveraging machine learning (ML) algorithms for predictive modeling and deep learning (DL) models for feature extraction, enhancing analytical accuracy and efficiency.
- Proposed a novel approach combining ML for predictive modeling and DL for feature extraction at an IEEE conference.
- Github Project Link

Technical Skills

Languages: Java, Scala, Groovy, Python, SQL
Libraries and Frameworks: Apache Spark, Spring-Boot, Lang-chain, Lang-graph
Technologies: Linux, Git, GitHub, Docker, Kubernetes, Gradle

Education

AISSMS Institute of Information Technology (Under SPPU) **Sept. 2020 – June 2024**
Bachelor of Engineering in Computer Science – 8.83 CGPA *Pune, Maharashtra*

Extracurricular

ACM Web Team **2022 – 2023**
Team Member *AISSMS IOIT*

- Web Development Project: Actively contributed to a web development project involving HTML, CSS, and Django, resulting in the successful launch of a new website for the ACM AISSMS IOIT student chapter.
- Conducted Educational Workshops: Led workshops teaching frontend skills, facilitating knowledge sharing and skill development among fellow students.
